

We are pleased to advise you that TFS Management Company has introduced an investment first in Zimbabwe. A safe and stable gold linked unit trust fund which offers all the financial security of the precious metal itself for your benefit.

The Tetrad Gold Fund is a unit trust investment that is backed by more than 50% gold and the balance in cash. However the fund manager will use his/her discretion to vary the weightings depending on the performance of the gold prices to the benefit of you the investor. The gold stocks are valued using the London Mercantile prices, while money market investments which are not repayable at full face value shall be valued at the market bid price.

In return the fund will offer you the following benefits:

- ✓ The ability to own gold without the inconvenience of storing the physical bars or opening a futures trading account offshore
- ✓ Direct exposure to gold price movements
- ✓ Sustained growth of income and capital value in the medium to long term
- ✓ The ability to participate in a diversified product range
- ✓ Secure protection against macroeconomic and geopolitical risks.
- ✓ A minimum deposit of \$150.00

If you wish to invest in the gold fund you can visit any of our offices listed below with the account opening requirements.
